

AUTOMATIC DUTY ALLOCATION

DAS AUTO ALLOCATION

In today's competitive bus sector it is vital that operators are able to deliver services efficiently and with optimal resource. You already know that Trapeze's DAS system offers essential cost management by ensuring efficient Duty Allocation - and it just got even better. Auto Allocation not only streamlines daily operations; it does so while paying for itself through improved speed, consistency and efficiency of allocation decision making; and reduced cost of allocation.

And because Auto Allocation takes away the bulk of 'standard' allocation work, it actually supports your best Allocators by ensuring they can focus their time on the challenging tasks that really require human intervention.

Key Benefits

Maximised Efficiency

- Maximise allocation efficiency (accounting for driver parameters and payroll rules)
- Fast, consistent decisions
- Support forward allocators with bulk of their workload

- Prioritise allocators' time for tasks that require their focus
- Reduce overall cost of allocation
- Works 24/7 - never goes sick or takes holiday
