PUBLICITY & NETWORK VISUALISATION

COUNTY MAPS

If you use external consultants for the design and production of county-wide service maps, you already know that this is both costly and involves reliance on external resource - and indeed, the cost of doing so is often a barrier to producing accurate publicity when services change.

Thankfully, NOVUS Publish now includes the ability to produce slick, professional-looking county maps at the touch of a button.

Best of all, this functionality uses entirely live data, so it serves as a powerful network visualisation tool. Planners can instantly filter services by type (e.g. all, evening, weekends and Sundays), making it easier to review the network in order to determine optimal coverage.
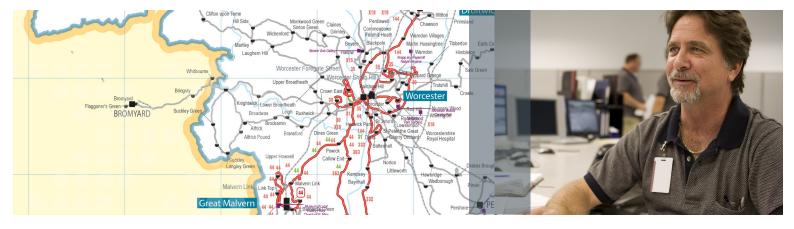

Key Benefits

- Effortless high quality printed county maps
- Reduce cost and reliance on external consultants
- Instantly produce accurate maps whenever services change
- Network planners: visualise & plan optimal routes
- Real-time service filters (e.g. all, evening, Sunday services)

Effortlessly produce printed County Maps
