

CIRCLE KPI DASHBOARD

FAST AND EFFECTIVE VISUAL DASHBOARD AND REPORTING

Trapeze's Circle KPI Dashboard gives Local Authorities full visibility over their reporting. It's designed to provide a quick, summarised view of data that can be used to inform effective business decisions.

Allowing users to define any reports they want against their databases, Circle KPI Dashboard is flexible and completely customisable.

Developed for Circle – but also compatible with earlier Trapeze products RouteWise and PASS - the system offers the opportunity to define trackable KPIs and measure statistics in real time, such as how many students are currently unallocated. Bubble maps can be embedded, showing data in a visual format that is easy to understand.

Circle KPI Dashboard supports drill-down reporting, commonly used for comparing costs across financial months. The module is set up to send email alerts, notifying users if certain parameters are met – for example, if the number of unallocated children reaches a predefined number.

Key Benefits

For Users

- Real time view of KPIs
- Quickly summarise data in an easy-to-view layout
- Measure statistics in real time
- Bespoke and customisable

For Managers

- Summarised view of data, informing effective decisions
- Top line information, easy digestible
